

SUMMER GLEN RESIDENTS 5.1.2023

Irrigation Watering Schedule

The pump cannot keep up with demand for water as too many owners are watering at the same time, and some are watering all their zones at once... and it overloads the pump and shuts it down. Several pump specialists (one from Munro) have been to the HOA to diagnose the issue, and all confirmed that the pump is operating properly, but is overloading and shutting down from too high of demand during the growing season.

The first step is to ensure that all residents only water one zone in their system at a time.

The second step in resolving this issue deals with a Watering Schedule:

Owners with odd-numbered addresses (including ½ addresses) must water on Monday, Wednesday, Friday and on Sunday from Midnight/12 AM – 9 AM.

Owners with even-numbered addresses must water on Tuesday, Thursday, Saturday and on Sunday from 9 AM – 12 PM and 6 PM – Midnight/12 AM.

The goal is to get everyone watered and to reduce demand during the heat of the season. There are currently no fines for the Watering Schedule. However, if this voluntary schedule is not followed, the Board will be forced to create a Watering Policy for the HOA that will include fines for violating the schedule. Please do your part and follow this schedule to avoid a situation where watering is monitored and fined.

If you wish to receive irrigation updates, please send your updated email address to contact@hoaservicesco.com. You will only receive information about your Association.
